Product Data

Castrol® EDGE® with SYNTEC® Power Technology
Advanced Castrol proprietary technology

Description

Castrol EDGE with SYNTEC Power Technology

Strength for Maximum Performance

Engine oils need to be able to constantly respond to the ever-changing environments in your engine. Every second of the drive your engine oil needs to be able to react to the needs of different metal-to-metal contact points in your engine each with different demands, pressures and temperatures. Castrol EDGE provides the highest level of protection for critical engine parts helping your car to perform at its maximum.

Castrol EDGE with SYTNEC Power Technology is the strongest leading full synthetic motor oil, stronger than Mobil 1 in our extreme test of strength.*

Application

• Performance – Superior performance for the oil change interval recommended in your owner’s manual or by your oil change monitor

• Power – Fights 42% more power robbing deposits**

• Protection – Superior engine protection versus conventional and synthetic blend oils***

* Castrol EDGE 5W-30 was proven stronger based on Castrol’s extreme test of maximum torque, strength and endurance versus Mobil 1 TM 5W30. Castrol EDGE 5W-30 meets Europe’s ACEA A/B specification while Pennzoil Platinum 5W-30 and Valvoline Synpower® 5W-30 do not.

** Compared with industry IIIG WPD (high temperature deposit) requirements

*** Based on ACEA A/B specification

Advantages

Exceeds engine manufacturer’s warranty requirements for applications requiring ILSAC GF-5, GF-4 and GF-3 (excludes 0W-30) and/or API SN, SM and SL (excludes 0W-30).

User Advice

Health and Safety
Based on available information, this product is not expected to produce adverse effects on health when used for the applications referred to above and the recommendations provided in the Material Safety Data Sheet (MSDS) are followed. MSDS’s are available upon request through your sales contact office or via the Internet at www.castrol.com/us. This product should not be used for purposes other than the applications referred to above. If disposing of used product, take care to protect the environment, return used oil to collection center.

Storage
All packages should be stored under cover. Where outside storage is unavoidable drums should be laid horizontally to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C, exposed to hot sun or freezing conditions.
